

## SUCCESS STORY

### Thank you to a Prometheus Partnership

#### Adrienne Tries a Hand Cycle

Thanks to the amazing support of Prometheus Real Estate Group, Outdoors for All has been able to reach more people.

With their PORCH Program, Prometheus gives back to the community to a charity of choice and Outdoors for All has been one of the chosen charities the last couple of years. For one of their PORCH Fundraisers, Cliffside, a Prometheus property in Gig Harbor, hosted a BBQ and raffle for its residents benefiting Outdoors for All and our adaptive programs. Little did we know, the hand cycle we brought to give residents an idea of what one type of adaptive cycle looks like, would get some great use.

We met Adrienne, a resident and wheelchair user, who came up, looked at the bike and said, "I've always wanted to try one. Just to see if I could do it."

After getting on the bike, she cycled around, excited at how much easier it was than she expected. This was the first time Adrienne had been on a bike in ten years and she hopes to be able to sit ski as well.

*"It's great to be able to focus on what I can do."*

*-Adrienne Barlow, Cliffside resident*

Thanks to partnerships like Prometheus and their PORCH Program, Outdoors for All is able to reach more people, like Adrienne, to get them to experience new activities, or introduce them to new ways to do favorite activities, in the outdoors.

*Adrienne, a resident at Cliffside, was able to try a hand cycle for the first time during a fundraiser the property hosted for Outdoors for All in support of PORCH, a Prometheus campaign to give to the community*

Adrienne loves to play, and was named an ambassador for, Wheelchair Pickle-ball, but is looking for more ways to get back into the outdoors she loves with cycling and skiing.
